

# CENTRAL MASSACHUSETTS SPACEMODELING SOCIETY

[www.cmass.org](http://www.cmass.org)

National  
Association of  
Rocketry  
[www.nar.org](http://www.nar.org)

CMASS is the major focal point in New England for the group of people whose common bond is an interest in building and flying model rockets. Rocketry is a safe, educational and enjoyable hobby that has been around since the mid 1950's. We have members as young as 5 and as old as you can get.

Our rockets vary from those common consumer model rocket kits you might buy at a local hobby store, to high power rockets which require skill and certification to build and fly. Most of our launches are open to the public as both spectators and flyers. At each launch, flyers are charged a one-time fee to help pay the rental cost of the field but spectators can always watch for free. Club members may purchase a Season Pass to cover their launch fees for the calendar year. Membership in CMASS will connect you with an energetic group of experienced people who share your interest in rockets.

For more information about CMASS membership or activities you can sign on to our club's web page at [www.cmass.org](http://www.cmass.org). If you'd like to join, you can print out the membership application and mail it to the address listed on it.

**Your Rocketry Adventure Begins When You Join CMASS!**
